PREFACE

This list is an expansion of the "Check List of Incunabula" issued by the Library in 1919. During the past five years the library has devoted a generous portion of the annual income from a special fund (the John M. Wing Foundation) to the purchase of books printed in the fifteenth century. As a result, nearly eight hundred books of this class have been added to the collection. The 1919 list recorded 270 editions, representing 144 presses, 34 cities, and 7 countries; the present list shows 953 editions, from 391 presses, 78 cities, and 9 countries. While the list was being printed 105 editions were received too late to be incorporated. These latest accessions add to the totals shown above, 25 presses and 4 cities (Metz, Grenoble, Valence, and Perugia).

It should be clearly understood that the present check list merely records the results of a preliminary examination of the books described. They have not been given full collation nor has their bibliographical and literary history been fully investigated; in many cases the identification given is only tentative and approximate. The list is not intended as a bibliographical contribution, but simply as a practical working hand list.

This list follows the model established by Robert Proctor, that is, the order of arrangement is chronological. The various countries are taken up in the order in which printing was introduced within their borders and under each country the cities are arranged on the same principle. The presses of each city appear in the order of their establishment and the books of each press according to the date of their publication, so far as this is ascertainable. Books which cannot be dated are entered last under the press that issued them.

Each entry in the list shows: (1) Date. (2) Author. (3) A brief title. (4) Shelf number. (5) Bibliographical references.

For the spelling of authors' names, titles, and the like, Proctor's usage is taken as a standard. In general his datings are also accepted, though in a few instances where later authorities have corrected his arrangement their dates are shown. The shelf numbers, also, are taken from Proctor, with the interpolation of decimals to bring into the scheme books which do not appear in his "Index." Prefixed to this number is an abbreviation to indicate the department of the library to which the books properly belong, though all of them, (except those in the Ayer collection) are now shelved in the Wing rooms.

The following are the full titles of the bibliographical authorities cited:

- B. Burger, K. The printers and publishers of the 15th century with lists of their works. London, 1902.
- BMC. British Museum. Catalogue of books printed in the 15th century now in the British Museum. London, 1908-
